Ideation Phase

Define the Problem Statements

Date	21 October 2026
Team ID:	SWUID2026402919
Project Name	IMovies - Online Movie, Event & Entertainment Ticket Booking System
Maximum Marks	2 Marks

Customer Problem Statement Template:

To define the core problems movie-goers, cinema managers, event organizers and administrators face when discovering and booking tickets online, and use those insights to guide the development of IMovies.

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	a movie-goer planning a show with friends	book seats together for a popular show	the seats I choose get taken by someone else and payment sometimes fails	there is no live seat availability or seat locking during checkout	frustrated and anxious about losing my seats and money.
PS-2	a frequent movie-goer in a busy city	find movies, cinemas and showtimes near me in one place	I have to check several apps and cinema sites	listings are scattered and search and filters are weak	annoyed and that I am wasting time.
PS-3	a customer whose plans have changed	cancel my booking and get my money back	the cancellation rules and refund status are unclear	policies are hidden and refunds are slow and not tracked	worried and unsure whether I can trust the service.

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-4	a cinema manager running several screens	schedule shows and keep every screen well filled	I cannot see live occupancy and show timings sometimes clash	bookings and schedules are handled manually or in separate tools	stressed and unable to plan or price shows well.
PS-5	an event organizer selling concert or workshop tickets	sell tickets by category without overselling	capacity and ticket types are hard to control and track	there is no tool that shows sales per category in real time	anxious and exposed to financial losses.
PS-6	a platform administrator	monitor bookings, refunds, users and revenue	data is spread out and hard to audit	there is no central dashboard, analytics or audit trail	overwhelmed and slow to respond to problems.
